

HEAVY DUTY Drain Maintainer

Biomor Heavy Duty Drain Maintainer is the next generation for drain and grease trap applications. This biologically based formulation contains a proprietary microbial consortium designed to specifically digest grease, oils, fats and control odours. It works in aerobic and anaerobic environments. Biomor Heavy Duty Drain Maintainer degrades and eliminates grease and other organic materials that accumulate over time. This product provides long-term proactive deep cleaning which effectively removes grease build-up in drain lines, grease traps, lift stations, wet wells, sewers, lagoons, septic tanks, wastewater sumps and sewage injection pits. This drain maintainer is environmentally responsible.

Benefits:

- Removes organic build-up from drains
- Reduces odours and helps keep pipes free flowing
- Will not harm drain systems
- Creates a bio-film and keeps working for up to 80 hours after application
- Ecologo certified
- Suitable for Food Plants

Ideal for:

- Restaurants
- Food processing plants
- Hotels
- High rise apartment buildings
- Institutional facilities that operate drain lines and discharge lines leading to a central grease trap
