

Keeping your Summer Camp HEALTHY & CLEAN

Nearly 6 million campers will attend summer camps in North America. Although summer is not typically known as cold or flu season, illnesses occur every year at hundreds of camps.

FACTS:

- Flu viruses and infectious diseases spread quickly through camps due to the close contact of campers, soiled skin and surfaces
- Infectious diseases cause 20% of all illnesses among campers and staff members
- A study shows that children will touch and retouch hard surfaces as many as 300 times in just 30 minutes
- Flu viruses, Norovirus, MRSA and other disease-causing bacteria can live on hard surfaces and remain contagious for more than 72 hours

IMPLEMENTING A GREEN CLEANING PROGRAM PROVIDES THE FOLLOWING BENEFITS:

- Improved Indoor Air Quality
- Reduced Levels of Harmful Bacteria
- Healthier and cleaner environment for children, staff and visitors
- Reduced exposure to toxic solvents and harmful gases

QUICK TIPS for a Healthy Season:

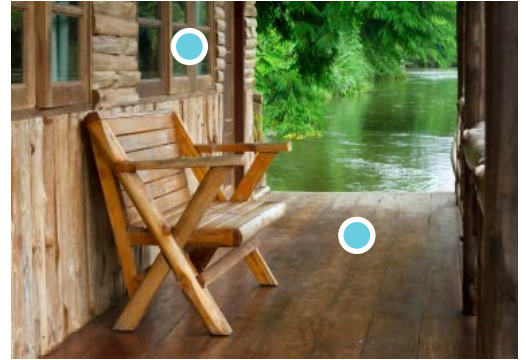

1. Wash hands frequently
2. Disinfect critical touch points (including faucets, door handles, light switches, toilet flusher, etc...)
3. Keep floors clean
4. Do not share personal hygiene items, towels or clothing

Clean, Healthy, Efficient, & Green

Avmor's Recommendations :

Description	Format	Code	Uses
 EP50 Cleaner Disinfectant 	4 x 1.8 L 4 x 4 L 1 x 20 L	2135257001 2135278001 2135334001	Critical Touch Points, Hard Surfaces, Floors, Washrooms, Mirrors
