EP51B Quaternary Disinfectant Applications

SPRAY AND WIPE APPLICATION:

Disinfection:

Walls, tables, chairs, toilets, sinks, shower stalls, countertops, exterior surfaces of appliances, garbage cans...

10 min.

Directions for use: Remove gross filth and heavy soil deposits. A pre-cleaning step is required and recommended for heavily soiled areas. Use 16 ml of EP51B per litre of water (1:61) using cold tap water. Apply disinfecting solution using a cloth or sponge to wet surface thoroughly. Allow treated surfaces to remain wet for 10 minutes and then let air dry. Prepare a fresh solution for each use. Rinse with potable water all surfaces which come into contact with food after disinfection.

Sanitizing:

Walls, tables, chairs, toilets, sinks, shower stalls, countertops, exterior surfaces of appliances, garbage cans...

60 sec.

Rinse with water if required

Directions for use: Remove gross filth and heavy soil deposits. A pre-cleaning step is required and recommended for heavily soiled areas. To sanitize previously cleaned and rinsed hard non-porous food contact surfaces, use 5 mL per liter (1:199) of cold tap water. Apply sanitizing solution using a cloth or sponge to thoroughly wet surfaces, walls and countertops. Let air dry. Rinse with potable water for food contact surfaces where required. Avoid contamination of food.

FLOOR APPLICATION:

Disinfection:

10 min.

Directions for use: Remove gross filth and heavy soil deposits. A pre-cleaning step is required and recommended for heavily soiled areas. Use 16 ml of EP51B per litre of water (1:61) using cold tap water. Apply disinfecting solution using a mop to wet surface thoroughly. Allow treated surfaces to remain wet for 10 minutes and then let air dry. Prepare a fresh solution for each use. Rinse with potable water all surfaces which come into contact with food after disinfection.

Sanitizing:

60 sec.

Rinse with water if required

Directions for use: Remove gross filth and heavy soil deposits. A pre-cleaning step is required and recommended for heavily soiled areas. To sanitize previously cleaned and rinsed hard non-porous surfaces, use 5 mL per liter (1:199) of cold tap water. Apply sanitizing solution using a mop to thoroughly wet the floor. Let air dry. Rinse with potable water.

Critical Touch Points

80% of infections are spread when someone touches a germ-ridden surface. This is why disinfecting critical touch points is so important. Critical Touch points include: telephones, keyboards, desks, faucets, flushers, elevator buttons, doorknobs and much more.
